1. Apologies/Introductions

Apologies were accepted. Introductions and a warm welcome was made to first time attendees of the ANCCG meeting

2. Minutes

No issues were raised with the previous minutes. The minutes from the previous meeting were recorded as true and correct.

3. Matters Arising

Andrew Melville to send a copy of the 30 year vision presentation to Matthew Palliser who will then distribute to ANCCG members.

If possible Auckland Airport to arrange a demonstration of the enhanced noise complaint software called ANOMS 8

Aircraft Noise Community Consultative Group

Minutes of meeting of the Group held at the Auckland Airport *Pohutukawa Room, Quad 5*,
Auckland Airport Wednesday, 19 March 2014 at 2.00pm

4. Community Board Feedback

Puketāpapa Local Board- Julie advised that she had one constituent that was emailing her every day with regards to aircraft noise and at the last business meeting she attended on the 2nd February many members of the public expressed concerns. They also raised concerns about how complaints are handled and that more information is needed to be provided to them.

Maungakiekie-Tāmaki- Simon advised that he receives regular complaints from some of his constituents. Some of them are quite distressed when they call him and this has become more apparent with the publicity given to aircraft noise. He noted that he has had good support from Auckland Airport with understanding the process.

Mangere- Tasi advised that for his local board area things have gotten worse since the last meeting. He is getting a lot of feedback with regards to Great Barrier Airlines and Fly My Sky aircraft that regularly over fly the Mangere Bridge area.

Howick - David advised that there is been more awareness with regards to aircraft noise because of the 'SMART' trial. He has been approached by the local paper and would like assistance gaining the information required to help respond to them.

Auckland Council- Andrew noted some noise complaints are coming directly to the Auckland Council and are being passed through to Auckland Airport. Councilor Alf advised that at the Mangere Bridge residents rate payers meeting the aircraft noise issue was raised and the general perception from members of the public was that the 'SMART' approaches were still going on.

5. Rules and Procedures Review

No changes to rules or procedures have been made.

6. Reports on Noise Complaints and the Noise Monitoring System

Marshall Day presented to the committee on the current noise complaint situation. Members agreed that they would like Marshall Day to continue to produce the map which shows noise complaints by geographical location.

Mike advised that the airport was looking at purchasing an upgraded noise monitoring and complaint management system called ANOMS 8. Noel suggested that at the next meeting a demonstration of this product is provided to the group.

Auckland Airport Wednesday, 19 March 2014 at 2.00pm**

7. Auckland Airport Community Trust (AACT)

Nil to report.

8. Noise Management Plan (NMP)

Nil to report

9. General Business

Andrew Melville presenting to the group on the airports 30 year vision.

Judy advised that it will be May 2014 now for the release of the draft SMART approach report. This is due to data needing more analysis and the airport wanting to get it right. This was support by John from BARNZ

10. Next Meeting

The next meeting will be held on the 18th of June- 1400hr at the Pohutukawa Room

Meeting closed at 1620hr

24 hour hotline for Noise Complaints – 09 256 8133
